L'HOMME AU CHEVET DES CORAUX

-

RESCUING CORAL REEF

Documentary (1 x 52') 16/9 - HD
Languages : French & English
Year of production : 2019

Coral reefs represent 0.2 % of the oceans, however it is inhabited by 25% of all marine species. It constitutes a richness for Humankind, providing food, protection and natural beauty. But the images of colorful corals, full of life are getting rare.

This documentary shows us the ways to protect them: from already implemented and successful techniques to solutions being tested nowadays and promising ideas still at early stage. We meet the researchers behind these innovations who are racing the clock to save these unique ecosystems.
